

## **LensCoat™ 400 f/5.6 INSTRUCTIONS**

### ***Piece 1- Lens Hood Cover***

Carefully slide and stretch the lens cover into place over the extendable lens hood.

Remove the tripod mount foot / rotating lens collar. This will allow for easy installation of piece 2.

### ***Piece 2***

After removing the tripod mount foot / rotating collar slide piece 2 down below the AF switch and distance scale.

### ***Piece 3***

Slide on piece 3 by lining up the 1/8 hole to the lens mount mark (red dot) on the lens being careful not to pull/stretch the whole too much to prevent tares.

### ***Rotating Lens Collar and AF/Distance Scale***

The LensCoat™ 400f/5.6 lens cover kit includes two 10½ inch strip of neoprene with adhesive tape applied to the back. Cutout the desired length for the parts of the lens collar and AF/Distance Scale section you want to cover. Cut the longest piece first. After all the cutting is done then remove the adhesive tape backing by carefully folding back a small corner and apply to the lens collar.
