

## **LensCoat® Pentax D FA\* 70-200 f/2.8 ED**

### ***Piece 1- Lens Hood Cover***

Remove the lens hood cover from the lens. Carefully slide and stretch the lens cover into place lining up the scalloped sections.

### ***Piece 2***

With the lens hood removed, stretch and slide piece 2 down from the glass to just above the zoom ring.

Remove the lens foot from rotating collar for easy placement of pieces 3-6

### ***Piece 3***

With the foot removed carefully slide and stretch slide piece 3 down the lens to the zoom ring.

### ***Piece 4***

With the foot removed carefully slide piece 4 it down the lens between the zoom and focus ring, lining up the window for the focus and limiter switch. **For final placement pull the window slightly away from the lens and adjust to the left or right.**

### ***Piece 5***

With the foot removed carefully slide and stretch slide piece 5 down the lens to the focus ring.

### ***Piece 6***

Slide on piece 6 by aligning the window for the distance scale. **For final placement pull the window slightly away from the lens and adjust to the left or right.**

### ***Rotating Lens Collar***

The LensCoat® Pentax D FA\* 70-200 f/2.8 ED lens cover kit includes a strip of neoprene with adhesive tape applied to the back for the rotating lens collar. Cutout the desired length for the parts of the lens collar you want to cover. Cut the longest piece first. After all the cutting is done then remove the adhesive tape backing by carefully folding back a small corner and apply to the lens collar.
